Hammersmith Hospital, Du Cane Road, London W12 0HS

Mr Marco Scarci, Consultant Thoracic Surgeon

I run a very busy clinical practice mainly focusing on minimally invasive surgery and chest wall conditions, in particular chest wall conditions after failed pectus deformity repair and trauma. I am familiar with the latest evidence on these conditions and have developed a strong research interest in this field.

I qualified from University G. D'Annunzio in Italy in 2001. Subsequently I have pursued postgraduate training in UK and Canada.

I am currently a Consultant Thoracic Surgeon at Imperial College Healthcare NHS Trust, before I was a consultant at Papworth Hospital in Cambridge and University College London Hospital. I have been a consultant for over 10 years.

Whilst I continue to work as a Consultant Thoracic Surgeon on a full-time basis, there is a short turnaround time for producing reports. I am normally able to see clients within 24h if needed and prepare a report within a week (subject to other commitments/annual leave). The time taken for the report is approximately 4–6 hours work but I can supply an approximate fee once full instruction and medical records for review are received. My hourly rate is £275 per hour.

As well as running my clinical practices, both NHS and private, I have set up and am running a successful international thoracic oncology symposium. I also research, have published (and continue to publish) and lecture in the field of single port surgery and chest wall conditions. I have published several chapters on these topics and have published 4 books.

I am involved in the leadership of the European Society of Thoracic Surgeons and am associate editors of journal of thoracic diseases and frontiers in surgery. I am a regular reviewer for some of the most prestigious journals in cardiothoracic surgery. I published over 150 articles in peer-reviewed journals.

I undertook Bond-Solon Expert Witness Training.
