House Officer, Oral Surgery & Conservation Dept's, Glasgow Dental Hospital and School, Glasgow

### **Details of Practicing Life**

Since qualification in 1996, I have worked very hard to ensure that my clinical practice has been patient centered with the patients' needs, well-being and comfort put far and away above any other consideration. I believe that is why I enjoyed a successful, busy, enduring practice with a loyal patient base.

As practice principal for over 12 years, my philosophy and approach to leading the practice was always effective communication and empathy. In December 2014, practice was awarded Gold Membership after 10 years on the scheme.

Due to my extensive and diverse experience, including that of Dental Practice Inspector for NHS Forth Valley, I am very familiar with the requirements of a modern dental professional both in their clinical and communication skills. I am therefore also very familiar with the FGDP(UK), GDC, SDCEP, SIGN, NICE and IR(ME)R publications and guidelines.

I currently provide clinical mentoring of younger colleagues within the Clyde Munro Dental Group. As of September 2018, this role will be formalized as the Regional Clinical Development Manager, overseeing the clinical provision and being responsible for the clinical support of 10 practices.

I am a member of Dental Mentors (UK) and have been involved in mentoring and supervision of a number colleagues for various reasons e.g. loss of confidence, GDC conditions, supporting those coming 'back to work' and overseas dentists wishing to work here.

Most recently, I have been appointed as an expert adviser to the National Institute of Health & Care Excellence (NICE), Centre for Guidelines and as an examiner for parts 1 and 2 of the MFDS RCPS Glasgow.

I am a diligent, conscientious and honest person who always gives my professional responsibilities the necessary time and commitment.

As a result of my years of experience, I am a good communicator and am able to use this skill in many different aspects of working life; staff management, patients complaint management and avoidance, complex treatment planning and professional relationships whilst still maintaining an affable and human perspective.
