## **EXPERIENCE:**

Moose has experience working with a wide range of client groups, from paediatrics through to elderly care, with particular expertise in traumatic and complex amputations following his work with British and foreign military personnel. He has experience in prescribing from the full range of available prosthetic components, knowledge of all variations of socket technology and an expert insight into overall amputee rehabilitation. Moose treats clients with all levels of both upper and lower limb loss, often with multiple amputations and numerous associated injuries.
