Curriculum Vitae of Dr Ganesh Bavikatte
MBBS, MD (Medicine), FRCP (London), FEBPRM (Europe)

Email: ganesh.bavikatte@nhsdoctor.net

Phone: 07466676562

Present Posts:

- **Consultant and Clinical Lead**- Neuro Rehabilitation Medicine,
The Walton Centre NHS Foundation Trust
Cheshire and Mersey Rehabilitation Network, Liverpool. (Since 2012- ongoing)
- **Clinical lead** North West Assistive Technology (Since 2013- ongoing)
- **Honorary Senior Lecturer**, School of Medicine, Liverpool University

Professional Qualifications:

1998	MBBS
2002	MD Medicine
2007	MRCP (U.K.), MRCP (London)
2010	ITQ Level 2 for IT users, NHS Manchester
2011	PGCE course workplace-based postgraduate medical education/ accredited clinical supervisor, North Western Deanery.
2012	Medical Leadership in Practice (MLiP course), Manchester Business School/ North Western Deanery
2012	FEBPRM (European Board- Physical Medicine and Rehabilitation)
2012	CCT (Rehabilitation Medicine), U.K.
2014	Cardiff University Law School- Medico-Legal Foundation certificate (CUBS)
2016	FRCP (London)

Curriculum Vitae of Dr Ganesh Bavikatte
MBBS, MD (Medicine), FRCP (London), FEBPRM (Europe)

Memberships:

General Medical Council (GMC)
Medical Defence Union (MDU)
British Society of Rehabilitation Medicine (BSRM)
Royal College of Physicians (London)
British Medical Association (BMA)
Member of the Association of Personal Injury Lawyers (APIL)
European Board of Physical and Rehabilitation Medicine
International Society of Physical and Rehabilitation Medicine

Professional Experience

I am a consultant, honorary senior lecturer, and clinical lead in the rehabilitation department at the Walton Centre in Liverpool.

I specialise in traumatic brain injury, polytrauma, neurorehabilitation, and stroke rehabilitation. In addition, I am an expert in using botulinum toxin to treat spasticity. My subspecialty interests include hyperacute rehabilitation, polytrauma rehabilitation, stroke rehabilitation and neurorehabilitation following complex injuries.

I run neurorehabilitation, spasticity and combined neurotrauma clinics with neurosurgeons, psychology, and charity organisations. I manage patients in Level 1 hyperacute and Level 1b specialist rehabilitation units. In addition, we take patients with acquired brain and spinal cord injury and patients with polytrauma and critical illness due to other acute medical and surgical illnesses. Our service was reported as exemplary by a national peer group team. I also have broader experience managing patients from acute and subacute units and community settings.

As a clinical lead, I am responsible for the smooth running of our service and specialist rehabilitation delivery according to national standards.

I am actively involved in undergraduate, postgraduate and multi and interdisciplinary teaching, audit, and research projects, which have led to posters and publications on an international platform to raise specialist rehabilitation profiles. I have also conducted national and international workshops. I author peer-reviewed journals and participate in professional societies like the British Society of Rehabilitation. I am the lead investigator for several research projects.

Books

- **Editor and main author**
Bavikatte et al., Spasticity: Early and Ongoing Management. Common Patterns, Botulinum Toxin Treatment, Ultrasound Localisation, Post-treatment Exercises. 1st Edition, June 2017.

Book Reviewed by Dr Boardman, ACNR 2020; 19(3):23
- **Editor and main author**
Bavikatte et al., Drooling of Saliva: Salivary glands, Management options, Botulinum toxin, Ultrasound localisation- 1st Edition, 2019
- **Co-Editor and Co-Author**
"A Practical Approach to Interdisciplinary Complex Rehabilitation" Elsevier Publication
1st Edition - 31st January 2022
Paperback ISBN: 9780702082764
- **Ganesh Bavikatte, David Mackarel**
Chapter 9: Botulinum Toxin for the Management of Spasticity
IFNR Textbook of NeuroRehabilitation, 2024

Past National Roles

- National Manager, British Society of Rehabilitation Medicine, UK representative to the European Board of PRM, 2021- 2024.
- Chair of the Specialist Group for Assistive Rehabilitation Technology (**SIGART**), British Society of Rehabilitation Medicine, 2021- 2023.
- Co-opted member, NICE (National Institute for Health and Care Excellence) Guideline scope Head injury: assessment and early management (update), 2021- ongoing
- Chair of the Specialist Group for Assistive Technology (**SIGEAT**) - British Society of Rehabilitation Medicine 2015-2021
- Member of the national clinical reference group (CRG) – specialist Rehabilitation 2013-2018

Past Regional Roles

- **Clinical Lead** Major Trauma Rehabilitation 2012-2024

Guidelines and International Roles

- Examiner of the European Board of PRM. 2021- 2024.
- National guidelines development group Spasticity in adults: Management using botulinum toxin 2nd Edition.
Royal College of Physicians/ BSRM 2017-2018
- **Traffic light system**- worked with internationally leading experts to develop an "Early warning scoring system for spasticity". This tool is for earlier prediction, identification, and spasticity management following a stroke.2018-2019
- **Toxnet group** - developing an international consensus statement to improve care and service for patients with spasticity, 2017- 2023.

Research and Innovation

I undertake several research and innovation projects in the field of rehabilitation.

Ongoing Projects and discussions

- Currently working as co-applicant for a project on Brain Recovery Initiative: An Inter-Disciplinary Neurorehabilitation Programme for Traumatic Brain INjury (BRAIN).
- Currently working on 2 projects exploring the role of artificial intelligence in rehabilitation medicine in collaboration with Liverpool and Edgehill Universities.
- U.K. Chief investigator for **PATTERN** – Multi-pattern treatment of upper and lower limb spasticity following stroke and TBI with Inco botulinum toxin. 2019-ongoing.
- Innovation projects: I started and led the project VERA (Virtual Engagement Rehabilitation Assistant), which combines Artificial Intelligence, Virtual reality, interactive gaming, and personal assistance. VERA provides personalised support to patients throughout the rehabilitation journey from 2018 to the present.

The initial prototype has been developed and implemented in the Complex Rehabilitation Unit inpatient setting at The Walton Centre, and the first research study has been completed. This study looked at VERA's acceptability, usability, and feasibility in an inpatient rehabilitation setting and identified barriers and enablers for implementation. As most rehabilitation is community-based, the project team is securing NIHR funding to support a second study to evaluate its use in a community setting.

- The principal investigator for the **Brain-computer interface study**, 2019-ongoing
- a) EEG-based Awareness Detection and Communication in Prolonged Disorders of Consciousness and Physical Disability
- b) Brain-Computer Interface Technology Use Involving People with Disorders of Consciousness or Locked-in Syndrome: The Lived Experience of Families and the Impact of Person-Centred e.q. Practice by the Interdisciplinary Team-IRAS-272691.
- **PI for EPITOME study:** a prospective, multicountry study to estimate the incidence of and provide a best practice model for monitoring the development of post-stroke spasticity

Previous

- Neurocrine: Dyskinesia Due to Cerebral Palsy. A Phase 3, Randomised, Double-Blind, Placebo-Controlled Study to Assess the Efficacy, Safety, and Tolerability of Valbenazine for the Treatment of Dyskinesia Due to Cerebral Palsy
- **NHSc research project:** Acceptability (including gastrointestinal tolerance and compliance) of a high-energy adult enteral formula with food-derived ingredients.
Acceptability and Tolerance Study of Compleat® 1.5 HP
Nestlé Health Science
- U.K. Chief investigator for **ASPIRE**- An international, multi-centre, prospective, observational study at selected North America, Europe, and Asia sites. 2015-2017.
- Research Collaborator for **FABRICA** Fatigue in Acquired Brain Injured Children and young Adults (FABRICA) is a national multi-centre research study exploring

Curriculum Vitae of Dr Ganesh Bavikatte
MBBS, MD (Medicine), FRCP (London), FEBPRM (Europe)

the experiences of children and young adults affected with an acquired brain injury (ABI). The University of Liverpool conducts the research with Alder Hey Children's Hospital and The Walton Centre collaborator centres.

- Principle investigator for **ABOLISH**- An international, multi-centre, prospective, observational study. 2020, terminated due to the COVID situation.
- Principal investigator for **TONIC-Stroke** (Trajectories of Outcomes in Neurological Conditions) pilot project, 2018-2019.
- The principal investigator for **Guided Self-rehabilitation** for long-term spasticity management, Pilot project, 2015-2016.
- Co-investigator for **ReMemBrlin** Study- the study of memory problems after Traumatic Brain Injury, 2014-2016.
- Supervising investigator for MRes Clinical Sciences (CNCS) project: Prevalence, Causes and Consequences of Sleep Disorders in Acquired Brain Injury, Liverpool University, 2014

Supervisor, PhD student projects, University of Liverpool

- A virtual assistant for promoting independent recovery and wellness
Supervisory team: Dr P Paoletti, Dr K D'Aout, **Dr Ganesh Bavikatte**
<https://www.liverpool.ac.uk/study/postgraduate-research/doctoral-training-programmes/projects/>
- Helping hand: A soft assistive device for upper-limb rehabilitation and assisted living
Supervisory team: Dr P Paoletti, Dr J Gardiner, Dr S Fichera, **Dr Ganesh Bavikatte**

Teaching and Training

- External examiner for Edge Hill University 2019- 2021.
- I set up or lead- specialist training courses on regional, national, and international platforms
- I lead the "Liverpool spasticity course" and "Anatomy Training, a cadaver-based training course".
- Regularly not only attend but also present/teach in local, regional, national, and international meetings
- I run Rehabilitation Medicine and assistive technology courses and training regularly
- **The reviewer of Journals:** Peer reviewer for many international rehabilitation Journals

Medico-Legal Training

- Regular updates on Medicolegal Practice
- Expert Medico-Legal report writing, Manchester, 11th July 2013
- Cardiff University Law School- Medico-Legal Foundation Certificate (CUBS) - 2013-2014

CONFIDENTIAL
