Professional registration:		
GMC 2414469		
Previous clinical experience:		
1) Consultant Physician Pilgrim Hospital United Lincolnshire Hospitals Trust Boston Period - November 1995-December 2019		
2) Specialist Physician. Taranaki Area Health Board, New Zealand. 1991-1994.		
3) Senior Registrar Trent Training Programme Geriatric Medicine Northern General Hospital Sheffield/Barnsley District General Hospital. 1986-1991		
4) Registrar Barnsley District General Hospital 1985-1986		
Prior to 1985, I have done other training posts in Medicine, General Practice and Paediatrics since qualification in 1978.		
My clinical role has been to provide medical care. I have progressed through a training regime until I became an independent practitioner as a consultant.		
As a consultant, I became more closely involved in service development, supervision and		

governance.

Medico legal experience

I have produced medico-legal reports since 2018. Most of cases are for the defence. Matters on which I have provided opinion include causality, mental state, fitness to plead and frailty.

I have undertaken continuing professional development in this area

Management experience:

I was clinical director from 2004-2007. Prior to this I was lead clinician when the Directorate was pan-Trust. During this period, the principal challenges were the introduction of:

- a framework to deliver Acute Medicine safely and effectively
- consultant appraisal
- the new consultant contract and job planning

These represented significant changes to existing structures and which were effectively implemented.

Since 2007, my principal management activities have been in the field of medical education. I was College Tutor from 2009-2012. Since 2012, I have been Training Programme director for the Core Medical Training programme in East Midlands (North). In this role, I have been responsible for ensuring the adequacy of training for core medical training in the region. Principal challenges were conducting the recruitment and assessment processes and the supervision of quality of training. This required working with different agencies including the Deanery, local education providers and the JRCPTB. It has involved collaborative working, and management, of College Tutors and educational supervisors. Key learning events organised include those on patient safety, medico-legal issues and professionalism. The programme has been recognised as among the best in the UK by the medical director of the JRCPTB.

I have been Head of Service for Stroke at Pilgrim Hospital. The challenge was to develop the service across the Trust. SSNAP ratings were consistently good (A,B).

Research experience: I have been involved in research for many years. Currently, I have been local principal investigator for a number of studies within the Stroke Research portfolio including FOCUS, SOS-Penumbra and XANTHUS.

I have developed the research agenda in Stroke at Pilgrim hospital. I have developed a strong research portfolio with involvement in studies within the CLRN research portfolio but also with commercial studies. I have worked closely with the RD department to bring these studies to ULHT and successfully enrol to them. I have good collaborative working with the research team at Pilgrim Hospital. We have had significant success with recruitment with a good recruitment record. Our external reviews were consistently satisfactory.

I was RD lead in 2010-11. During this period I worked to foster the idea of research culture within the organisation and to engage clinicians with research.

I was a member of the RD Strategy Group and the Research implantation Group.

I have carried out my own research for an MD thesis and for a MMedSci dissertation in Medical Education.
