**Areas of Clinical and Medicolegal Experience and expertise:**

1. ADHD
2. Compensation claims arising out of personal injury, medical negligence, educational negligence or negligence by public bodies
3. Inquests and deaths
4. Gaming and technology addiction
5. Attachment disorders
6. Conduct Disorder / Oppositional Defiant Disorder
7. Autism Spectrum Disorder
8. Self-harm in Looked After Children (LAC) and Young offenders
9. Placement breakdowns in Looked After Children

**Areas of Medico-legal Expertise**

1. **Personal Injury / Medical Negligence:**
  - a. ADHD and/or behavioural problems arising out of brain injury / birth hypoxia.
  - b. Compensation claims arising out of personal injury leading to mental health problems (e.g. PTSD).
  - c. Compensation claims arising out of alleged institutional negligence (Local Authorities or other statutory and non-statutory bodies) or medical or educational negligence.

- d. Negligence claims arising out of suicide in children and young people. I have been instructed by both claimant and defence solicitors.
- e. I get equal instructions from Claimant and Defence solicitors.

## **2. Regulatory law:**

- a. Assessment of professionals' conduct by their professional organisations (e.g., Health Professions Council, General Medical Council)
- b. Assessment for breach of Legislation related to delivery of care and services by children's homes, CAMHS (Child and Adolescent Mental Health Services), children's social services.
- c. Coroners' inquests

## **3. Criminal Matters:**

- a. Psychiatric Reports and assessments in criminal cases for Crown, Youth and Magistrates' Courts.
- b. Assessment for ADHD (Attention Deficit Hyperactivity Disorder), particularly for repeat offenders
- c. Assessment for Learning Disability in the context of offending
- d. Psychiatric Assessments for Fitness to Plead cases
- e. Assessment where defendant is charged with murder
- f. Pre-sentencing Assessments
- g. Criminal Responsibility and Learning Disability
- h. Assessment of Dangerousness / Risk Assessment
- i. Sexual Crimes including sexual harassment
- j. Arson
- k. Violent Criminal Assessments including Murder
- l. Violence /Self Harm/Suicide
- m. Risk assessment for planning release from custody.
- n. Abnormal Behaviour

**4. Care Proceedings / Public Law Outline (PLO) cases:**

- a. Single expert report for submission to court in care proceedings
- b. Determining appropriateness of placement for children in care
- c. Risk assessment to determine placement
- d. Advice on therapeutic input required for success of placement
- e. Assessment in cases of contact disputes

**5. Private Family Law:**

- a. Assessment of children in disputed divorce proceedings.
- b. Assessment in cases of contact disputes

**6. Parenting Assessment:**

- a. Assessment of parenting in the context of an assessment of an infant / child.  
My parenting assessment specifically looks at the 'goodness of fit' between the child (with its difficulties) and the parent(s) (with their difficulties).
- b. Parenting assessment of teenage parent(s).

**7. Systemic Operant Solutions (SOS):**

Systemic Operant Solutions is a method of finding solutions for vexing problems in the Care System. It is commonly deployed in the following circumstances:

- 1. Multiple placement breakdowns
- 2. Difficulties in contact between parent and child who is in care
- 3. Social Workers (and the wider care system) feeling 'stuck' and unable to find a way out

4. Conflict between Local Authorities and Birth Family having direct impact on the child in care (CIC)

SOS combines two well-known approaches in the field of psychology and family therapy – Systemic Thinking and Operant Conditioning. It aims to find solutions by implementing change through the *systems* around a young person and using a person's innate motivation to achieve positive change.

These reports are usually commissioned by Local Authorities to find the most widely acceptable way forward for all parties concerned.

## 8. Gaming and Technology addiction:

Gaming and technology addiction is increasingly being acknowledged to lead to or arise from pre-existing mental health difficulties. Gaming and technology addiction can have similar behavioural outcomes as seen with other substances of dependence. In the medico-legal field, Gaming and technology addiction is likely to be increasingly recognised in the fields of criminal law and civil law. The former when there is a blurring of boundaries between fantasy and reality (e.g. in Autism Spectrum Disorder cases) and the latter in allegations of neglect, abuse and exploitation.

---

## RELEVANT EXPERIENCE

---

1. **Clinical Director** of Community Wellbeing and Mental Health (CWAMH) services for children, young people and families. The services include community and inpatient CAMHS, Speech and Language Therapy, Community Child Health Services, 0 – 19 services and Paediatric Psychology.
2. **Clinical Lead**, Yorkshire and Humber Operational Delivery Network for Autism and Learning Disability. The ODN provided thought leadership to commissioners and providers of services for those with learning disabilities and/or autism. Amongst others, it advocated for a Lifespan Approach to these conditions and brought service users and other stakeholders together.

3. **Clinical Lead, NHS England's** Yorkshire and Humber Clinical Network for Children and Young People's Mental Health. My role was to connect various stakeholders – particularly clinicians and commissioners – towards having a shared understanding of challenges and to promote and disseminate good practice.
4. **Associate Clinical Director**, NHS Sheffield CCG and People's Portfolio, Sheffield City Council.
5. **Associate Medical Director**, Sheffield Children's NHS Foundation Trust
6. Consultant Child and Adolescent Psychiatrist in the **Sheffield Forensic CAMHS Team**. This role involves assessment and management of mental health problems in young offenders and those at risk of offending.
7. Consultant Child and Adolescent Psychiatrist providing mental health input to **Aldine House, a Social Services Secure Unit**. Aldine House provides accommodation to young offenders and young people placed in secure accommodation on welfare grounds.
8. Consultant Child and Adolescent Psychiatrist providing mental health input to the Sheffield's **Looked After Children Mental Health Team (MAPS for LAC)**. The team provides support to carers of children under local authority care. My role involves assessing and managing complex and severe, 'hard to place' young people in the care system.
9. Preparation of Court Reports in Criminal and Welfare Proceedings. Expert witness reports in negligence and compensation cases.
10. Appearance as Expert Witness for cross examination. Appeared for case quoted in Bailii.

---

#### RELEVANT TRAINING

---

I have attended various training courses including one by Bond Solon for my medico-legal work.

I also attend training courses for my clinical practice and am in good standing with the Royal College of Psychiatrists.

I am multilingual being able to speak Hindi, Marathi, Gujrati and some Urdu.

---

## FUNDING

---

- Dependent on a case by case basis

---

## TIMESCALES

---

My reports are submitted within 12 weeks of receipt of all paperwork. Inclusion of medical records (including CAMHS) helps in timely completion of reports.

---
