Online Consultations

We offer Online Consultations through video conferencing platforms. Consulting with your client online allows us to analyse their scarring in detail and obtain a much clearer understanding than what would normally be achieved through still photographs. We are also able to answer any questions they may have on skin camouflage and offer guidance on various application techniques once suitable products have been recommended.

Our Skin Camouflage Expert Reports can be prepared and supported by any previous Medical Reports, all Part 35 Compliant.

Skin Camouflage Consultancy Ltd has built a strong reputation providing over 2000 Medico-Legal Reports for Solicitors and Insurance companies all over the country. Working alongside Val Ross, I had attended clinics with Val between 2013-2016 gaining clinical experience run by Changing Faces Organisation.

I have been holding my own clinics at Harley Street for over 5 years. I am a fully trained practitioner licensed at Harley Street, London running and managing clinics in Rodney Street, Liverpool.

As a Skin Camouflage Consultant and practitioner, I specialise in the area of skin camouflage and concealment. I use techniques I have learnt over the years through practice, and incorporate make-up artistry skills to address symmetry and balance where necessary. I have the ability and am trained in recreating features such as freckles and eyebrows, along with contouring, shading and highlighting areas where necessary. My product range is very wide and specialised, and I have spent the last 9 years ensuring I am familiar with new products, trying and testing them. I use products which are accepted as a medical and psychological aid. They are listed within the BRITISH NATIONAL FORMULARY and are recognised by both the British Association of Dermatologists and The British Association of Plastic & Reconstructive Surgeons.

Skin Camouflage creams are highly pigmented and specially formulated products that can help the impact of scarring and other skin conditions. They have the capability to be made water

resistant and are formulated to adhere to smooth scar tissue. The products are all hypoallergenic and fragrance free.

I provide support and guidance in skin camouflage applications and techniques to men, women and children who have a range of disfigurements i.e. scars, skin graft tissue, burns, pigmentation, etc. Skin Camouflage can provide significant impact in the assistance of rehabilitation where negative self-image from disfigurement can aggravate psychological damage. Any part of the face, body, limbs may be treated with a topical non-invasive procedure. It can greatly assist in improving confidence and self-esteem. The treating of the visually apparent aspects of the disfigurement can assist in the psycho-social issues faced by trauma injury clients.

I am also trained and qualified in Medical Micropigmentation and other non surgical cosmetic treatments like Medical Needling. I offer long term solutions for treating and camouflaging scarring. Micropigmentation infuses pigment into scar tissue reducing the appearance by up to 80%. I am able to relax scars using digital Micropigmentation creating a smoother overall appearance. I also perform Areola restoration for patients combining my creative expertise and various techniques, in order to help build confidence.

Medical Needling can help treat and reduce the appearance of different scars long term and treat a variety of different skin conditions.

I am able to determine these non-surgical procedures are suitable for each individual, and if so provide projected costings for treatment as well as or instead of Skin Camouflage Creams.
